A replacement name for a New Caledonian Calliostoma species (Gastropoda: Trochidae)

Bruce A. Marshall

Museum of New Zealand Te Papa
Tonganewa
PO Box 467
Wellington
NEW ZEALAND

As a result of procedural omission during preparation of a recent paper (Marshall, 1995), I overlooked the fact that a specific epithet chosen for a new Calliostoma species was already in use by Quinn (1992).

Calliostoma (Benthastelena) kanakorum new name

The replacement name is for the indigenous people of New Caledonia and Vanuatu.

LITERATURE CITED

Quinn, J. F. 1992. New species of Calliostoma Swainson, 1840 (Gastropoda: Trochidae), and notes on some poorly known species from the western Atlantic Ocean. The Nautilus 106:77—144.

Erratum

In the section “Type material” in Simone et al. (2000: 139) we inadvertently printed an incorrect paratype number. The USNM paratype number therein should be 580725, not 2016009 as originally stated.
